### **Detailed Action**

This office action is a response to applicant's communication submitted December 28, 2007 wherein claims 1, 13, 14, and 16 are amended and claims 2, 5, 19, and 22-24 are cancelled. This application claims benefit of provisional application 60/442060, filed January 24, 2003.

Claims 1, 3, 4, 6, 13-16, 20, and 21 are pending in this application.

Claims 1, 3, 4, 6, 13-16, 20, and 21 as amended are examined on the merits herein.

Applicant's amendment, submitted December 28, 2007, with respect to the rejection of instant claims 1, 2, 5, 6, 13, 14, 16, 19, and 22-24 under 35 USC 102(b) for being anticipated by Esko et al., has been fully considered and found to be persuasive to remove the rejection as the claims as amended no longer claims the synthetic oligosaccharides of Esko et al. In particular, the claimed species do not include an aglycone moiety. Therefore the rejection is withdrawn.

Applicant's amendment, submitted December 28, 2007, with respect to the rejection of instant claims 1, 2, 5, 6, 13, 14, 16, 19, and 22-24 under 35 USC 102(b) for being anticipated by Hwang et al., has been fully considered and found to be persuasive to remove the rejection as the claims as amended no longer claims the chitosan oligosaccharides of Hwang et al., but only claims short di- and tri- saccharides that are fully N-acetylated. Therefore the rejection is withdrawn.

### **Reasons for Allowance**

Claims 1, 3, 4, 6, 13-16, 20, and 21 are seen to be allowable. The claimed methods of treating myocardial dysfunction such as sepsis, septic shock and SIRS are not seen to be taught or fairly suggested by the prior art, as discussed below.

The claimed invention is adequately described and enabled by Applicant's specification. For example, p. 13, line 1 – p. 14, line 7 of the specification as originally filed provides adequate written description to show that Applicant was in possession of the claimed invention at the time of filing. Various examples in the specification, such as example 2 on pp. 39-53 and example 5 on pp. 70-75 demonstrate the claimed method in such a manner as to enable one skilled in the art to practice it. The methods of claim 14 for reversing myocardial depression are enabled by example 5 on pp. 70-75 of the specification. Therefore Applicant's disclosure is sufficient to satisfy the requirements of 35 USC 112.

Furthermore the claimed invention is novel and non-obvious over the prior art. The prior art does not disclose any method of treating sepsis, septic shock, or myocardial dysfunction by administering di- or tri- (N-acetylglucosamine). Although Esko et al. discloses antiinflammatory disaccharides including disaccharides of N-acetylglucosamine, these compounds contain a required aglycone moiety that significantly alters their structure. Also, although Hwang et al. discloses chitosan as being useful for treating septic shock, chitosan is much longer than two or three saccharide units and contains free amino groups rather than being fully acetylated. One

Art Unit: 1623

of ordinary skill in the art would not have had any reason to remove the aglycone moiety from the compounds of Esko et al., or to substitute the short oligosaccharides of the instant claims for chitosan in the methods of Hwang et al. Therefore the claimed invention is seen to be novel and non-obvious over the prior art.

Accordingly, Applicant's amendment submitted December 28, 2007 is sufficient to remove all rejections made in the prior office action as discussed above and to place the application in condition for allowance.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled, "Comments on Statement of Reasons for Allowance."
